

 **Important note:** When you edit this page, you agree to release your contribution into the **public domain**. If you don't want this or can't do this because of license restrictions, please don't edit.  This page is one of the *Public Domain Help Pages*, which can be freely copied into fresh wiki installations and/or distributed with Foresight Wiki software; see [Help:Contents](#) for an overview of all pages.

You can obtain copies of the help system in this wiki for local use in your own wiki following these steps:

1. In a separate browser window, navigate to [Special:Export](#) (on **this** wiki). You will see an open textbox asking you for a list of pages to export.
2. Copy the [list](#) below and paste it into that textbox. This is a generally useful set, making the resulting help structure in your wiki look almost identical to the one here.
3. Check the following boxes:
 - ◆ "Include only the current revision, not the full history" (**Important!**)
 - ◆ "Include templates"
 - ◆ "Save as file"
4. Click the 'Export' button.
5. Save the file to your desktop or other convenient location you'll remember.
6. Navigate to Special:Import on **your** wiki. Note that you must be logged in as an Admin/Sysop (or another user with the import right) to do this.
7. Browse for the file you saved, and click 'Upload file'.
8. Navigate to [Special:Imagelist](#) (on **this** wiki).
9. For each image referenced below, click on the (file) link and save the image to the same location as before.
10. Navigate to Special:Upload in **your** wiki and upload each of the images.

You will probably have to edit some of the pages to fix links, but at least this will provide a starting point.

Also keep in mind that most default wiki installations do not support SVG images. Information about SVG support can be found in the [Help:Image Administration#SVG](#)

page.
