

Usage

This template displays an error message when not given sufficient parameters

(It needs three arguments min. two colors followed by text), and the error message is suppressed whilst this page is viewed directly.

Purpose

This template is a template work around for incompatible behaviors in Fs, nested in conjunction with TextColors (A witable delimited form, used to develop this 'div style' version).

where parameter "*border=various*"

... allows a variety of add on style effects, such as padding and borders ---- normal legal HTML inside 'div style' blocks.

wherein arguments #'s

(1) and (2) — Set foreground and background colors of the given block of text respectfully. They can be specified by name or in the format #ddddd (RGB hex triplet).

(3) — is the text to be displayed inside a colored block, omission of which leaves the 'bright' error message shown above. In general, most other templates will work within this field. However, some may not parse properly due to template nesting arcana.

(4) — is the optional div block width parameter. (default is full width, or 100%)

(5) — is an optional Font Size parameter. (default is very small, or Font Size 1)
