

Usage

This template produces a comma-separated list of zero to ten items.

```
{{series
|type=or or |type=and    (to specify whether "or" or "and" appears before
last item in list)
|item1|item2|item3 ... |item10}}
```

Examples

Is your favorite color red{{series |type=or|blue|yellow|green}}?

Is your favorite color red, blue, yellow or green?

My favorite colors are red{{series |type=and|blue}}.

My favorite colors are red and blue.

Is your favorite color red{{series |type=irrelevant}}?

Is your favorite color red?

The primary intent is for this template to be passed conditional parameters in a form similar to:

```
{{series |type=and|{{first}}|{{second}}|{{third}}...|{{tenth}}}}
```

If some of these passed parameters are blank then the series template will ignore them. This can allow other templates to generate comma separated lists of variable length.
