

Talk:Risk_management

Contributors: Bogdan Dragotoiu, Cristina Sima, Maria Alexandra Baescu

Hi both,

I've just finished to read both articles on Risk management, and mainly I would like to write about what ideas really stuck in my mind and the ones which I think are true also I found 2 nice quotes which I would like to share. Hope that is ok with you, also!

Regards, Cristina

Hello Cristina and Bogdan,

In developing the article regarding Risk management, I have decided to extract from the two research papers by Jacques G. Richardson the most relevant cases that can help me in providing a classification of risks. Also, I think the measures that were taken to avoid or overcome risks can be very useful when structuring our article.

Let me know if you agree with me on this aspect.

Best regards, Maria
