

Template to aid switching the font-size used for a text string.

Syntax

`{{resize|N|text}}` or `{{resize|text}}`

N specifies a size, such as "90%", "1.2em", etc. For the default case (the second above), *N* is set to "90%".

Examples

`{{resize|1.2em|This text is 0.2em larger than normal}}`

This text is 0.2em larger than normal

`{{resize|80%|This text is 80% normal size}}`

This text is 80% normal size

`{{resize|This text defaults to 90% normal size}}`

This text defaults to 90% normal size

Alternate

`{{smaller|Text}}`

= `{{resize|Text}}`

(i.e. *Text* will appear at 90% normal size.)
